

School-Based Therapists and Special Educators NEED:

- Professional development CEUs.
- Access to best-in-class courses, live webinars, and industry-lead conferences for license renewals.
- An education-specific online platform with student-focused resources - all in one place!
- All-in-one access to student data, therapy materials, videos, IEP Goals, and session notes.
- So much **MORE** than what Zoom, Google Meet, or Microsoft Teams offers for teletherapy!

Across the globe, school-based therapists and educators are conducting remote therapy sessions and classrooms. However, most therapists are not finding online tools that are specific to providing therapy for special education students. Video conferencing teletherapy platforms, student management systems, and incorporating session content during sessions can be cumbersome and confusing when piecing together the right solutions.

VERGE LEARNING's marketplace is your school district's one-stop shop for access to everything your teachers and therapists need to participate in successful and easy-to-use online therapy and classroom sessions, while managing their students and content all in one place.

Here are some of the special education-focused tools and solutions VERGE LEARNING's marketplace offers your school or school district:

continued...

The **VERGE LEARNING** family strongly believes that combining the right blend of highly customized teletherapy technology with special education-specific content leads to better results for you and your students. We will continually grow our family of solutions to support your teachers and therapists while providing students with the best possible online learning experience available.
